

# With You.

The WashU Campaign

**What if** a university could redefine higher education, transcending the traditional boundaries between research and practice and leveraging new knowledge for tangible good?

**WashU is realizing this vision:**

- The Brown School celebrates a century of impact as a top U.S. school of social work while we are launching a new School of Public Health.
- We are pioneering holistic leadership training for every student while recruiting visionary academic leaders to serve as school deans and effect change in our communities.
- Siteman Cancer Center at Barnes-Jewish Hospital and WashU Medicine leads cancer treatment worldwide, while our medical school sets the bar for research excellence — ranked No. 2 in the country for funding from the National Institutes of Health in federal fiscal years 2023 and 2024.

These are just a few examples of how we advance our core mission to discover knowledge, cultivate leaders, and treat patients.

**With you, we have laid the foundation for global impact.** Now, we seek to mobilize our strengths to be a place of actionable solutions to the world's most pressing challenges. This is why McKelvey Engineering works to improve air and water quality; our business school increasingly supports the commercialization of medical discoveries; our Division of Student Affairs promotes health and well-being, academic success, and other important student outcomes.

“WashU’s vibrant community will define the next chapter of our story. With You: The WashU Campaign is about dreaming boldly, thinking expansively, and imagining what we can accomplish together as one talented, focused, and driven community.”

Chancellor

**WashU**

# Join us.

With your engagement and philanthropy, we will achieve a more promising future for all. Invest in our strengths and our people, and ignite the change you wish to see in the world.

**WashU Medicine:** We are home to one of the largest academic biomedical research institutions in the world, which is defined by a uniquely collaborative approach. With you, we can achieve breakthroughs in the science of aging, cancer, neuroscience, personalized medicine, and more — and translate all into better patient care by swiftly moving discoveries from bench to bedside.

**Scholarships:** Greater access to a WashU education is foundational to our institutional mission. With you, we will deepen and sustain our recent commitments to students, including the WashU Pledge for limited-income undergraduate students from Missouri and southern Illinois, the move to need-blind undergraduate admissions, and our no-loan undergraduate financial aid policy.

**WashU Public Health:** We are creating a world-leading new school for the 21<sup>ST</sup> century, founded on team science and building on the university's strengths in medicine, public health, and social science. With you, we can enact systems-level change to mitigate longstanding health disparities exposed during the coronavirus pandemic. Together, we will improve health locally and beyond.

**Annual Fund:** Our Annual Fund expands the university's margin of excellence, upholding WashU as a premier institution for higher learning. Our Eliot Society, whose members contribute \$1,000 or more in a single fiscal year, provides essential leadership in these efforts. With your Annual Fund support at any level, we will ensure best-in-class student services, faculty resources, experiential learning, and more. This includes a new goal of offering an internship stipend to every entering student. In addition to covering essential costs for our students and programs, the Annual Fund enables the chancellor and deans to seize opportunities and respond to challenges as they arise, catalyzing dynamic projects and initiatives.

**Academic Distinction:** WashU is an unparalleled environment for innovation and excellence in research and education. With you, we will increase seed funding for ambitious, transdisciplinary research projects that unite scholars around large-scale, multifaceted challenges. Meanwhile, we will enhance curricular innovations to ensure the utmost excellence in teaching and learning.

If you could change  
one thing in the world,  
*what would it be?*

Your endowed or spendable gift to support WashU faculty, students, or research helps build a more promising future for all.
